

Clear as the air

The indoor air quality is essential to ensuring good quality of life. We have passionately worked for over 45 years with the objective of manufacturing not simply fans, but innovative, technologically advanced, environmentally friendly and human health focused products.

Strong as our prospects

The path followed by our company is part of the history of a large German industrial group, which started as early as 1928, the year when Christian Maier set up Maico Elektroapparate. Since then, the group has been able to build up a well established industrial reality and to acquire the technological and commercial know-how which has allowed it to become one of the top names in the ventilation industry. In the last few years, the group focus to grow on a global level has been speeded up and materialised with important investments in emerging markets: a culturally exciting and highly promising scenario.

Green as the future

Problems like global warming and atmospheric pollution affect us not just as a company working with air but also as human beings. For this reason all our efforts aim to investments, industrial process and products that lead the way in terms of efficiency, cost-effectiveness and environment respect. Many are the rules today that show an ever increasing desire to breathe clean air, from the Kyoto protocol to the many building regulations; we are proud to accept the challenge because we strongly believe that we must work together to win the battle for a clean environment for all. Why not say it, **“it’s our great aspiration!”**

  Dal 1970 la ventilazione made in Italy

For more than 45 years our product range has followed a seamless thread: from the first fans, Elicent policy to combine design, practicality and advanced technology is easy to see. The result is an outstanding Italian product which has earned wide recognition around the world. All our production is 100% made in Italy, in Lonato del Garda (Brescia) where we design and produce all the fans that are then exported in more than 70 countries.

Our products are CE certified and compliant with ErP Directive 2009/125/CE and EU Regulations 327/2011 and 1253/2014.

Guidelines for a correct ventilation

Selecting the correct fan

Extraction is always made from humid/polluted premises: kitchens, laundries, toilets, bathrooms, bars... To choose the fan airflow needed for a specific application, use the following calculation:

$$\text{Airflow} = \text{volume of the room in m}^3 \times \text{number of air changes per hour}$$

Type of room	Air change per hour
Kitchens	6 - 10
Bathrooms and shower rooms	8 - 12
Toilets	8 - 10
Public toilets	10 - 15
Restaurants and bars	10 - 12

Setting the fan correctly

- Fans should always be mounted in the furthest window, wall or ceiling from the main source of air replacement to ensure airflow across the room and avoiding short circuiting of air movement.
- Air replacement should be ensured via internal grilles in the door, ceiling or wall.
- Fans should be located as high as possible in the window or wall nearest to smells or streams but not directly above eye-level grilles or cooker hoods.

- If installing in a bathroom, the fan must be located where it cannot be touched by a person. Elicent range of 12 Volt SELV fans (Safety Extra Low Voltage) can be installed in zone 1. Fans with IPX4 protection can be installed in zone 2. Fans with an IPX2 protection must be installed in zone 3.

Choosing the right Elicent version

Operation

STANDARD version
Light/remote control switch.

PULL CORD switch

TIMER
Integral electronic timer adjustable from 3 to 25 minutes.

COMFORTIMER
Microchip Timer version adjustable from 3 to 25 mn with overrunning at low speed for an energy saving up to 64% compared to a standard timer version. The low speed guarantees increased silence and energy saving though maintaining a fully satisfying exhausting efficiency. Version particularly suitable for hotels, hospitals, private homes and for all those applications where silence is a must.

MHT humidity control
Integral humidity control adjustable from 40 to 80% of R.H.

MHY Smart humidity control
Provided with the latest microchip technology. Operation: automatic and progressive increase / decrease of the motor speed according to the percentage of R.H.

COMFORT HYGRO
Combines to Comfortimer technology a microchip humidity sensor adjustable from 40 to 80% of R.H.

P.I.R.
Passive infra-red sensor with integral adjustable timer from 3 to 25 minutes.

12 VOLT
Low voltage version.

2 V
Double speed version (24 hours running at the lowest speed).

EC MOTOR
High efficiency, electronically controlled, brushless motor.

RESIDENTIAL VENTILATION WITH HEAT RECOVERY

Ventilation with heat recovery is a clean and simple technology which provides great comfort and savings: it enables to create an hygienic microclimate throughout the home, combining comfortable living, protection of the building and energy efficiency.

SAVINGS

- Lower heating and air conditioning bills.

- Low energy consumption.

Optimising insulation investments (window frames, wall and loft insulation, roof) which would be wiped out with a natural ventilating system: on average, in fact, open windows lead to a loss of 50% of heat from the home.

WELLBEING

- Fresh, clean air at a comfortable temperature improves your quality of life and sleep.

- A clean and filtered air prevents allergens from multiplying and promotes the removal of pollutants.

- Low noise level: quiet equipment operation and protection from external noises.

PROTECTING YOUR PROPERTY

- Preventing damage caused by dampness and condensation.

- Preventing mould.

- Protecting the value of your property.

COMFORT

- Practical, versatile and customisable modular operation.

- A reliable system which ensures the correct ventilation in every season.

- The ideal solution for energy requalification of buildings.

INTEGRATED SOLUTIONS FOR A WHOLE-HOUSE COMFORT

Decentralized HRU

Suitable for any kind of room.

RECsmart

RECsmart+

RECduo100

RECSanAir

Centralized HRU

The centralized HRU is located in a technical room or in a false ceiling. The hot internal air extracted from the premises goes through a heat exchanger before being expelled outside. The fresh air coming from outside is first filtered and then goes through the exchanger where it recuperates the heat released by the extracted air.

Decentralized HRU

5 Good reasons to choose it

- Need to better the indoor air quality with punctual solutions for each kind of room.
- Presence of an air quality or ventilation problem limited to a unique room or a small house.
- Impossibility to install a centralized HR system.
- Need to renovate or requalify the house at limited costs.
- Avoid important masonry interventions.

REC SanAir WINDOW

Single - Room HRU

For single rooms up to 40 m²

Comply with ErP Directive and UE Regulation 1253/2014 Ventilation Unit (VU)

- Thermal efficiency up to **75%**
- Easy to install: no ducting system or heavy masonry required. A hole of \varnothing 100 mm is sufficient.
- Ideal for refurbishment and energy requalification.
- Drastic solution to humidity and condensate problems.
- EC motors.

OPERATION

- Tubular heat exchanger with separate flows for a perfect hygiene.
- Balanced double flow, 24/7 running.

ACCESSORIES

Built-in installation

RLS Remote Speed control (min-max) and on/off switch.

- New design with cover
- Suitable for surface or built-in installation
- Ease of connection by the means of removable terminals
- Protection IP42
- Weight 0,40 Kg
- Supply voltage 230V – 50/60 Hz
- Dimensions 110 x 80 x 42

FEATURES

- 3 models with duct \varnothing 100 mm and 3 standard lengths for wall thickness up to 600 mm.
- Suitable for any kind of room. Ideal for wet rooms like kitchens and bathrooms.
- Extremely compact and versatile: can be installed in horizontal or vertical position.
- High energy saving thanks to EC motors
- Integrate by-pass and antifreeze functions.
- Provided with 3 filters: the air is filtered in both flows before entering the heat exchanger.
- Easy maintenance and cleaning: filters and heat exchanger are removable and washable.
- Comply with EN 60335-2-80, B.T. 2014/35/UE, EMC 2014/30/UE.

INSTALLATION EXAMPLES

Suitable for any kind of room
Ideal for wet rooms like kitchens and bathrooms.

VERSIONS

STANDARD
version

I 24/7 running at the minimum speed.

II The unit switches at the highest speed through a manual command on a remote control (switch, push button or RLS controller).

III The highest speed is provided with a timer (adjustable from 0 to 30 minutes). At the end of the delay running, the fans automatically turns back to the minimum speed.

MHY Version

Humidity control

I 24/7 running at the minimum speed.

II The unit switches to the highest speed automatically through the humidity sensor. The maximum speed is reached progressively according to the humidity level of the room.

III Once the humidity goes under the pre-set level (adjustable from 40 to 90% of R.H.), the unit automatically switches to the minimum speed.

Also the MHY version is provided with a timer adjustable from 0 to 30 minutes for the manual boost at the maximum speed. The function is useful in case it is necessary to have the fan running at the maximum speed independently from the humidity level (see point III standard version).

DIMENSIONS (mm)

INSTALLATION

Single rooms up to 40 m²

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014. Residential Ventilation Unit.

- Integrated Humidity Control
- Thermal efficiency up to **75%**
- Easy to install: no ducting system or heavy masonry required. A hole of \varnothing 100 mm is sufficient.
- Ideal for refurbishment and energy requalification.
- Drastic solution to humidity and condensate problems.
- EC motors.

OPERATION

- Tubular heat exchanger with separate flows for a perfect hygiene.
- Balanced double flow, 24/7 running.

FEATURES

- **REC smart+** is available in a range of 3 models corresponding to 3 different duct length, with a unique duct diameter 100 mm. The measures reported on the dimensional drawing refer to the maximum thickness of the wall on which the ventilation unit can be installed: 400, 500, 600 mm.
- 3 models with duct \varnothing 100 mm and 3 standard lengths for wall thickness up to 600 mm.
- Suitable for any kind of room. Ideal for wet rooms like kitchens and bathrooms.
- Extremely compact and versatile: can be installed in horizontal or vertical position.
- High energy saving thanks to EC motors
- Integrate by-pass and antifreeze functions.
- Provided with 3 filters: the air is filtered in both flows before entering the heat exchanger.
- Easy maintenance and cleaning: filters and heat exchanger are removable and washable.
- Comply with EN 60335-2-80, B.T. 2006/95/CE, EMC 2004/108/CE.

OPERATION

REC smart+ is designed for a 24 hours running at the minimum speed. The unit switches at the highest speed through a manual command on a remote controller (remote switch / push button, radio controller or Touch Panel) or automatically (through the integrated humidity sensor or via the Touch Panel weekly programming). Both models RC and TC are provided with the MHY Smart humidity control (a technology patented by Maico Italia) which allows to have the ventilation speed automatically set according to the detected humidity level.

The BOOST function (maximum speed) is provided with a timer (adjustable from 0 to 30 minutes) that can be activated through remote controller (switch, light switch, radio controller, touch panel). The function is useful in case it is necessary to have the unit running at the maximum speed independently from the humidity level.

MODELS

REC smart+ RC

The model is supplied with a remote radio controller. The ventilation unit is provided with 3 LED that indicate the operation modality, including the sleep mode and the extraction mode, as well as the indication of potential anomalies.

Through the remote radio controller it is possible to manage the following functions:

- On/Off
- The Speed/ventilation level regulation
- The Sleep modality that allow to have the unit running silently at low speed during the night (the boost function is excluded)
- The post-ventilation function (Timer function, adjustable from 0 to 30 minutes) to delay the switching of the unit at the minimum speed

REC smart+ TC

The model is supplied with a remote Panel Touch controller with coloured screen. The ventilation unit is provided with 3 LED that indicate the operation modality, including the sleep mode and the extraction mode, as well as the indication of potential anomalies.

The Touch Panel allows to manually or automatically manage (through the weekly programming) the following functions:

- The Speed/ventilation level regulation
- The ventilation modality (by-pass function, free-cooling, only extraction, only immission)
- The threshold humidity level over which the unit increases its speed
- The post-ventilation function (Timer function, adjustable from 0 to 30 minutes) to delay the switching of the unit at the minimum speed)
- The Sleep modality that allow to have the unit running silently at low speed during the night (the boost function is excluded)

REMOVE THE MOULD AND BREATHE A HEALTHIEST AIR !

BEFORE

AFTER

REC duo 100

**Coupled installation
in a single room
or 2 separate rooms**

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014. Residential Ventilation Unit.

- Thermal efficiency up to **90%**
- Ø100
- Easy Installation and maintenance:
 - Magnetic coupling/uncoupling of the unit.
 - External grille with net, installable from the inside.
 - Telescopic duct.
- Wireless communication (REC duo 100 PLUS RC)

REC Duo 100 is a "push-pull" HRU with reverse flow. It is provided with a ceramic heat exchanger that accumulates the heat from the extracted air during the "pull" cycle and releases it to the new fresh air during the "push" cycle.

Decentralized Heat Recovery Unit

FEATURES

- Very high efficiency decentralized HRU with heat recovery up to 90%.
- Ideal for residential applications and in any ambient where it is necessary to ensure a constant thermal comfort both in the summer and in the winter.
- Suitable for any kind of rooms.
- A coupled installation is recommended to optimize the system efficiency, in a single room or separate rooms.
- Direct exhaust through walls with thickness from 300 to 500 mm (adaptable to other wall thickness from 220 to 1000 mm: see section Dimensions).
- Suitable for conveying air to a max. temperature of 40°C.
- Stylish and ultra-slim front cover. Very compact dimensions.
- Provided with filters G3 class both in intake and in extract, easily removable and washable.
- Free-cooling function.
- EC brushless motor.
- Comply with EN 60335-2-80, LVD 2014/35/UE, EMC 2014/30/UE.
- IPX4
- CE marked

MAGNETIC COUPLING UNCOUPLING OF THE UNIT TO THE CONNECTION PLATE

MODELS & OPERATION

REC DUO 100
Cod. 2RC1100

24 hours running in push-pull modality at low speed (selectable between 2 at installation).
The unit switches to the extraction operation modality when speed boost is activated through remote control switch or RLS controller (available as accessory). The maximum speed is provided with a timer (adjustable from 0 to 30 minutes). Once concluded the overrun via timer, the fan automatically switches back to the push-pull operation modality at low speed.

REC DUO 100 MHY
Cod. 2RC1200

24 hours running in push-pull modality at low speed (selectable between 2 at installation).
The unit switches to the extraction operation modality when speed boost is activated, manually or automatically: **Manually** via control switch or RLS controller (available as accessory). The maximum speed is provided with a timer (adjustable from 0 to 30 minutes). Once concluded the overrun via timer, the fan automatically switches back to the push-pull operation modality at low speed.
Automatically via humidistat (adjustable from 45 to 85% of R.H). The fan speed increases/decreases according to the humidity level detected above the pre-selected threshold. It then switches back to the push-pull operation modality at low speed when the humidity level goes beneath the pre-selected threshold.

RLS
Cod. 2RV4158

Available as accessory for REC DUO 100 and REC DUO 100 MHY

- On-Off
- Boost speed

REC DUO 100 PLUS RC
Cod. 2RC1300

24 hours running in push-pull modality at low speed (adjustable by the end-user).
Boost speed is available in push-pull modality and turns on automatically via humidistat (adjustable from 45 to 85% of R.H) and increases/decreases progressively according to the detected humidity level.
In case of a persistent and high concentration of humidity, the unit automatically switches to the extraction operation modality. It then switches back to the push-pull operation modality at low speed when the humidity level goes beneath the pre-selected threshold. The unit is supplied with a remote controller for the selection and activation of advanced comfort ventilation functions.

REC Duo 100 PLUS RC is supplied with a remote controller through which selecting the speed and managing the following operation modalities:

0 - On/off

1 - Push-pull operation modality

24 hours reverse flow running at the selected speed

2 - Speed 1

3 - Speed 2

4 - Boost speed with timer (extraction mode only)

5 - Sleep mode

the operation at low speed is frozen for 8 hours to ensure high acoustic comfort during the night. The function can be unblocked at any time by pressing any button (except button 0).

6 - Flow control

operation in intake or extract mode only.
Press once: extraction mode
Press twice: intake mode

7 - Free-cooling mode: air exchange without heat recovery

Led signal:
any time a button is pressed, a led switches on the remote controller to indicate that the signal has been received.

DIMENSIONS (mm)

External grille installable from the inside.

For walls with thickness > 500 mm:

It is necessary to use the telescopic duct available as accessory
Cod. 2KT0014

For wall thickness between 220 and 300 mm:

It is necessary to cut the duct and to use the external grille MFE, available as accessory
Cod. 2GE2002

REC SanAir WALL

REC SanAir IN WALL

REC SanAir WINDOW

Single rooms up to 40 m²

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014
Classification: Residential Ventilation Unit.

- Thermal efficiency up to 82%
- Highly efficient filtering system
- Enthalpic heat exchanger
- EC motors

FEATURES

- Decentralised heat recovery unit with high efficiency enthalpic heat exchanger for residential application.
- Thermal efficiency up to 82%.
- Very high efficiency filtering system with double filter F8 + G4 **which allows the retention** of at least 98% of PM2,5, 99% of PM10 and 100% of pollens.
- Ultra slim and aesthetic design. Lightweight and easy to install.
- Wall/window frame installation
- 5 ventilation levels: from 15 to 41 m³/h.
- Free-cooling and Antifreeze functions.
- Low consumption: from 4 W
- Silent running: < 30dB in night mode.
- Comply with B.T. 2014/35/UE, EMC 2014/30/UE.
- **CE** marked

Centralized HRU

The centralized HRU is located in a technical room or in a false ceiling. The hot internal air extracted from the premises goes through a heat exchanger before being expelled outside. The fresh air coming from outside is first filtered and then goes through the exchanger where it recuperates the heat released by the extracted air.

Residential ventilation units - Horizontal installation

2 - 8 rooms

REC in linea 140

Thermal efficiency **91%**
EC Brushless Motor
 Free cooling / Integrated By-pass
 Energy Class **A**

- Ideal up to 4 rooms
- Airflow up to **140 m³/h**
- Low consumption (**min. 10W**)

REC in linea 180

Thermal efficiency **91%**
AC or EC Brushless Motors
 Free cooling / Integrated By-pass
 Energy Class **A (EC)**

- Ideal up to 6 rooms
- Airflow up to **180 m³/h**
- Low consumption (**min. 15W EC - min. 60W AC**)

REC in linea 220

Thermal efficiency **91%**
AC or EC Brushless Motors
 Free cooling / Integrated By-pass
 Energy Class **A (EC)**

- Ideal up to 8 rooms
- Airflow up to **220 m³/h**
- Low consumption (**min. 35W EC - min. 60W AC**)

Residential ventilation units - Vertical installation

up to 10 rooms

REC 280

Thermal efficiency **93%**
AC motor
 Free cooling / Integrated By-pass

- Ideal up to **10 rooms**
- Airflow up to **280 m³/h**
- Low consumption (**min. 80W**)

REC 320

Thermal efficiency **93%**
EC brushless motor
 Free cooling / Integrated By-pass
 Energy class **A**

- Ideal up to **10 rooms**
- Airflow up to **320 m³/h**
- Low consumption (**min. 40W**)
- **Available with Touch Panel included (TC version)**

New versions with **Touch Panel** for the weekly programming of the indoor comfort.

2 - 8 rooms

Energy class A (EC Versions)

Comply with ErP Directive and UE Regulation 1253/2014 Ventilation Unit (VU)

- Thermal efficiency up to **91%**
- High energy saving thanks to EC motors
- Compact and modular
- Energy Class A (EC versions)

VERSIONS

REC in linea AC

Provided with external rotor motor and forward blade impeller 2 speed running: continuous running at the minimum speed, maximum speed is activated through remote control.

REC in linea EC

Provided with brushless motor for an optimal combination between high performance, silence and low energy consumption.

CONTROLLERS

SUPPLIED

RLS 1 WR

- Remote control
- Manual selection of three modality of continuous running:
 - I - Low ventilation modality
 - II - Intermediate ventilation modality
 - III - Intensive ventilation modality
- Supply voltage 230V - 50/60 Hz
- Weight 0,50 Kg
- Dimensions 75 x 75 x 30

Supplied with REC in linea EC 140 - 180 - 220

ACCESSORY

RLS 3V - 3 speeds

- Remote 3 speed control (Min/Max) and On/Off switch
- New design with cover
- Suitable for surface or built-in installation
- Ease of connection by the means of removable terminals
- Protection IP42
- Weight 0,40 Kg
- Supply voltage 230V - 50/60 Hz
- Dimensions 110 x 80 x 42

Accessory for AC versions of REC in linea 180

FEATURES

- High efficiency centralized heat recovery units with thermal efficiency up to 91%.
- Compact and modular.
- Horizontal installation in false ceilings.
- Lightweight and easy to install.
- Suitable for \varnothing 125 mm ducting system.
- Made in PPE for a perfect thermal and acoustic insulation.
- Provided with integrated by-pass.
- Multispeed high efficiency EC brushless motors.
- Low sound level.
- Filters class M6 in addition to the filters assembled.
- Supplied with fixing plate, and RLS 1WR control panel (EC motor versions).
- IPX2.
- Comply with EN 60335-2-80, B.T. 2014/35/UE, EMC 2014/30/UE
- Performance measured by BRE according to EN 13141-7, EN 13101-4, EN 5801 and EN 308.
- CE marked

MODELS

Complete range composed of 3 models for houses up to 8 rooms:

REC in linea 140

- Ideal for houses up to **4 rooms** and average surface of 80 sqm.
- Installation configuration: **2 intake points and 2 extract points.**
- Max airflow **140 m³/h.**
- Integral by-pass.
- EC motors.

REC in linea 180

- Ideal for houses up to **6 rooms** and average surface of 100 sqm.
- Installation configuration: **3 intake points and 3 extract points.**
- Max airflow **180 m³/h.**
- Integral by-pass.
- AC or EC motors.

REC in linea 220

- Ideal for houses up to **8 rooms** and average surface of 120 sqm.
- Installation configuration: **4 intake points and 4 extract points.**
- Max airflow **220 m³/h.**
- Integral or separated by-pass.
- AC or EC motors.

REC IN LINEA TC

Centralized Heat Recovery Units Horizontal installation

2 - 8 rooms

Energy Class A

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014 Residential Ventilation Unit.

- Thermal efficiency up to **91%**
- Tested by **BRE according to EN308**
- Integrated by-pass
- EC motors

CONTROLLERS

REC In Linea TC is supplied with a remote Touch Panel controller with coloured screen. The panel allows to manually or automatically manage (through the weekly programming) the following functions:

- The Speed/ventilation level regulation
- The ventilation modality (by-pass function, free-cooling, only extraction, only immission)
- The threshold humidity level over which the unit increases its speed
- The post-ventilation function (Timer function, adjustable from 0 to 30 minutes) to delay the switching of the unit at the minimum speed)
- The Sleep modality that allow to have the unit running silently at low speed during the night

FEATURES

- High efficiency centralized heat recovery units with thermal efficiency up to 91%.
- Compact and modular.
- Horizontal installation in false ceilings.
- Lightweight and easy to install.
- Suitable for \varnothing 125 mm ducting system.
- Made in PPE for a perfect thermal and acoustic insulation.
- Provided with integrated by-pass.
- Multispeed high efficiency EC brushless motors.
- Low sound level.
- Filters class M6 in addition to the filters assembled.
- Supplied with fixing plate, and RLS 1WR control panel (EC motor versions).
- IPX2.
- Comply with EN 60335-2-80, B.T. 2014/35/UE, EMC 2014/30/UE
- Performance measured by BRE according to EN 13141-7, EN 13101-4, EN 5801 and EN 308.
- CE marked

Centralized Heat Recovery Units Vertical installation

FEATURES

- Centralized heat recovery unit for vertical installation.
- Suitable for \varnothing 125 mm ducting system.
- Casing made in galvanized steel sheet with epoxy finish
- Internal panels in PPE for a perfect thermal and acoustic insulation.
- Integrate or optional by-pass.
- Multispeed high efficiency motors.
- Low sound level.
- Integrated filter system class G4.
- Supplied with RLS 1WR control panel (EC motor versions).
- IPX4.
- Comply with EN 60335-2-80, B.T. 2006/95/CE, EMC 2004/108/CE
- Performance measured by BRE according to EN 13141-7, EN 13101-4, EN 5801 and EN 308.

Up to 10 rooms

Energy class A (REC 320)

- Thermal efficiency up to **93%**
- High energy saving thanks to EC motors

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014 Residential Ventilation Unit.

DIMENSIONS (mm)

RESIDENTIAL AND COMMERCIAL EXTRACT VENTILATION

Centralized extract ventilation

High efficiency central ventilation solutions for air extract: the stale air is exhausted from humid rooms (kitchen, bathroom, toilets, laundry). The fresh air is supplied by specific air entrance points.

- High energy efficiency with EC motors.
- Designed for ease of installation and low noise running
- All models available with EC motors. 

MICROBOX

MULTIBOX

Decentralized extract ventilation - Design and Performance

AXIAL FANS

Axial fans are designed to extract large volumes of low pressure air directly to the outside or over short duct lengths. They can be suitable for wall, window, duct and ceiling application.

CENTRIFUGAL FANS

Centrifugal fans are designed to extract air over long distances and to overcome the resistance of long length and curved ducting. They are suitable for wall, ceiling, roof installation, in single or multiple ducts.

DUCT INSTALLATION

OUTDOOR INSTALLATION

MICROBOX

Whole-house mechanical extract ventilation Super-slim centrifugal box

Comply with ErP Directive and UE Regulation 1253/2014 Ventilation Unit (VU)

- High energy saving
- SUPER-SLIM
- Extreme ease of installation and maintenance
- All versions are speed controllable

* Lp(A) measured at 3m in open field 230V-50Hz.

Comply with ErP Directive 2009/125/CE and EU Regulation 327/2011. Classification FAN.

- Duct fans, entirely made of polypropylene.
- For direct installation between ducts.
- Easy inspection and maintenance by simply opening the clamp and removing the fan.
- Helicentrifugal mixed flow impeller with downstream stator. Made in ABS.
- Asynchronous motor, 2 and 3 speeds, depending on model.
- IP 44 Protection, Motor Class B.
- Robust motor with ball bearings, maintenance-free.
- 220 - 240 V at 50 Hz.
- Speed control using phase control or transformer (exception: Version with timer).
- Thermal overload protection as a standard feature.
- Externally fitted terminal box with cable entry grommet.

BENEFITS

- High efficiency resulting in minimum energy costs.
- Quiet running thanks to optimized aerodynamics and guide vanes.
- Easy installation: pre-installed mounting brackets and external connection box.
- Simplified maintenance by loosening the clamps (no need to handle the duct).
- Versatile installation.

*LpA measured at 3m in open field 230V-50Hz.

Comply with ErP Directive 2009/125/CE and UE Regulation 1253/2014. Residential Ventilation Unit. To comply with the ErP2018 parameters, a local demand controller must be used.

- High performance centrifugal fans for roof installation.
- Compact sizes, available with or without square roof curb.
- Easy and cost-effective solution for a centralized ventilation requirement.
- 7 models Ø100 to 315 mm
- Made in aluminium and steel sheet with epoxy finish, highly resistant to atmospheric agents.
- Ball bearing motor.
- EC Version available

RESIDENTIAL AND COMMERCIAL EXTRACT VENTILATION

@max

MAXIMISE YOUR VENTILATION EXPERIENCE

NEW

OPTIMIZED DESIGN

INTERCHANGEABLE OUTLET SPIGOTS

@max is supplied with 3 interchangeable spigots of Ø 80, 100 and 120 mm, replaceable with a click, for an easy and quick installation on any standard air duct sizes.

SILENT AND HIGHLY EFFICIENT IMPELLER

The advanced aerodynamic design of the impeller, which is also provided with an antivibration gasket, combines high airflow capacity and the lowest noise level between, 15 and 29 dBA at the maximum performance.

DETACHABLE MOTOR-IMPELLER

The frame is featured with a quick connection in order to facilitate and speed up the fan installation or maintenance without the use of tools.

INTEGRATED SERVICE SWITCH

@max is equipped with an integrated on/off slide switch for a quick disconnection to power mains and a safe maintenance operation.

INTEGRATED SMART FUNCTIONS

@max is provided with different integrated smart functions which optimize its operation and reduce the energy consumption.

OPTIMIZED EFFICIENCY

@max outlet spigots are provided with deflectors, optimized through a Computational Fluid Dynamic (CFD) analysis, to ensure a maximized efficiency.

@max IS THE INNOVATIVE UNIVERSAL AND MODULAR AXIAL FAN DESIGNED FOR A MAXIMIZED COMFORT VENTILATION IN SHOWER ROOMS, BATHROOMS, KITCHENS AND ANY RESIDENTIAL PREMISES WHERE INDOOR AIR QUALITY IS A MUST. ITS ADVANCED AND INTEGRATED CONTROL FUNCTIONS ALLOW SOLUTIONS TAILORED TO PERSONAL NEEDS: A SMART AND FRIENDLY INNOVATION AT THE SERVICE OF YOUR WELL-BEING.

Universal modular axial fan

Comply with ErP Directive 2009/125/CE and UE Regulation 1253/2014
Classification: Residential Ventilation Unit

- **Modular axial fan provided with 3 outlet spigots of Ø80 - Ø100 - Ø120 mm**
- Suitable for axial flow discharge towards the outside or through short ducts.
- Versatile installation on wall or ceiling.
- Very compact sizes and ultra-slim profile (33 mm without spigot), available with fixed grill.
- Equipped with an on/off service switch on board for a quick and safe disconnection from power mains.
- Integrated smart functions settable and controllable on board or via remote control according to versions.
- **Multi tension 110-240V 50-60Hz** ball bearing electronically commutated motor.
- Made of high quality antistatic technopolymer material.
- Optimized aerodynamic and fluid dynamic design.
- Impeller provided with an antivibration gasket.
- Aesthetic and smart LED on the cover with changing colors according to the ventilation modality.
- Back-draught shutters available on spigots (Ø 100 and 120).
- In compliance with EN 60335-2-80, EMC Directive 2014/30/UE, LVD Directive 2014/35/UE.

DIMENSIONS (mm)

CURVES

VERSIONS

STANDARD

On/Off via control switch (light or remote)

2V DT - 24 hours running at low speed (selectable between 2 at installation). Speed boosts to maximum via control switch (light or remote). The maximum speed is provided with a timer (adjustable from 0 to 30 minutes) which activation can be delayed up to 2 minutes to avoid unnecessary night-time operation at the highest speed. (DT/Delay Timer function, selectable at installation).

MHY - 24 hours running at low speed (not selectable). Speed boosts to maximum automatically or manually.

- **Automatically** via humidistat (adjustable from 45 to 85% of R.H). The fan speed increases/decreases according to the humidity level detected above the pre-selected threshold. It then switches back to the minimum speed when the humidity level goes beneath the pre-selected threshold and once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min).

• **Manually** via control switch (light or remote). The fan boosts to maximum via the manual switch and goes back to the low speed once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min).

PLUS - 24 hours running with minimum and maximum speeds both adjustable.
The operation is similar to the MHY version. In addition, the fan is provided with the DT/Delay Timer function (see E max 2V DT).

PLUS RC - This version is similar to the e max Plus one. In addition, it is supplied with a remote control from which it is possible to set 2 additional functions:

- an intermediate speed which will adjust automatically according to the minimum and maximum speeds selected.
- a sleep mode function that excludes the timer and humidistat functions for a period of 8 hours, preventing night disturbance.

CURVES

ELEGANCE EC 2V

- Energy efficient EC motor.
- Choice of 2 low speeds at installation.
- Provides low level continuous ventilation to control condensation.
- For any domestic wet room.
- Low noise levels and running costs.
- Wall, ceiling or window (with additional window kit) installation.

GENERAL FEATURES

- Exhausts directly to the outside (through wall, or window installation with additional window kit, or with medium length ducting - up to 6m).
- Runs continuously at pre-selected choice of two speeds (fixed at installation).
- Speed 1 operates at 31 m³/h (9 l/s) (factory set).
- Speed 2 operates at 54 m³/h (15 l/s).
- Anti-vibration gasket.
- Speed boosted to maximum 99 m³/h (27,5 l/s) using integral pull cord or by:
 - Remote switch/light switch
 - Remote PIR sensor
 - Humidistat
- Patented anti-turbulence deflectors ensure very low noise levels and optimum performance.
- Energy saving ventilation.
- Extremely low running costs.
- Low carbon footprint.

TECHNICAL FEATURES

- Shockproof, high quality technopolymer casing.
- Designed using latest wind tunnel technology and CFD simulations.
- EC induction motor with thermal protection.
- 43,000 hour life motors with maintenance free and long life ball bearings.
- Operates in ambient temperatures up to 40°C.
- Double insulated - no earth required.
- IPX4 - Splashproof rated - can safely be installed in Zones I and II.

VERSIONS

EC 2V DT

24 hours running at low speed (selectable between 2 at installation). Speed boosts to maximum via control switch. The maximum speed is provided with a timer (adjustable from 0 to 30 minutes) which activation can be delayed up to 2 minutes to avoid unnecessary night-time operation at the highest speed. (DT option, selectable at installation).

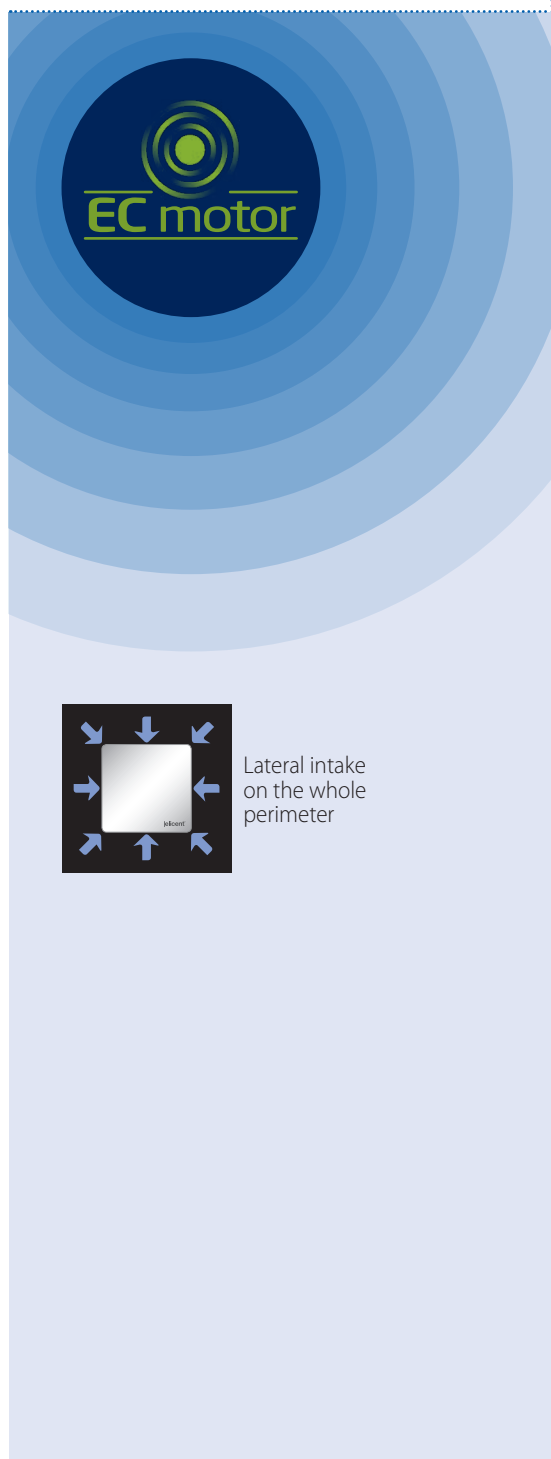

EC 2V HDT

24 hours running at low speed (selectable between 2 at installation). Speed boosts to maximum automatically and/or manually:

- automatically via humidistat (adjustable from 40 to 90% of R.H). The fan switches back to the low speed when the humidity level goes beneath the pre-selected threshold and once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min).

- manually via control switch (remote or pull cord). The fan switches back to the low speed once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min). The activation of the timer can be delayed up to 2 minutes to avoid unnecessary night-time operation at the highest speed. (DT option, selectable at installation).

All EC models (100 2 speed, 2V DT, 2V HDT) are also available in SELV version, low voltage 12V.

CURVES

Comply with ErP Directive 2009/125/CE and EU Regulation 1253/2014 (Classification: Residential Ventilation Unit)

- To exhaust air directly to the outside or into a short length ducting (max 3 m length).
- Suitable for toilets, bathrooms, WC's, shower-rooms, utility rooms and kitchens.
- For wall, panel and ceiling installation.
- Available sizes: Ø 100, Ø 120, Ø 150.
- Manufactured in shock-proof high quality technopolymer.
- Maintenance free, self lubricating sleeve bearing motor for long life and noiseless running.
- Induction motor with overheating protection 230V – 50 Hz.
- Easy maintenance and cleaning.
- MURO 100 A with electric opening of the grille.

MODEL	A	B	C	D	E	F	Kg
ELIX 100	180	180	116	87	99	29	2,6

ELIX EC 2V

- Energy efficient EC motor
- Provides low level continuous ventilation to control condensation
- Choice of 2 low speeds at installation
- For wall or ceiling installation
- For any domestic wet room
- Low noise levels and running costs

GENERAL FEATURES

- Exhausts directly to the outside or through long lengths of ducting (up to 15m).
- Runs continuously at pre-selected choice of two speeds (fixed at installation).
- Speed 1 operates at 29 m³/h (8 l/s) (factory set).
- Speed 2 operates at 50 m³/h (14 l/s).
- Max speed boosted to maximum 100 m³/h (28 l/s) using integral pull cord or by:
 - Remote switch/light switch
 - Remote PIR sensor
 - Humidistat
- Anti-vibration gasket.
- Easily removable, washable polypropylene filter.
- Energy saving ventilation.
- Extremely low running costs.
- Low carbon footprint.

TECHNICAL FEATURES

- Shockproof, high quality technopolymer casing.
- Designed using latest wind tunnel technology and CFD simulations.
- Profile increases the fluid dynamics.
- EC induction motor with thermal protection.
- 43,000 hour life motors with maintenance free and long life ball bearings.
- Operates in ambient temperatures up to 40°C.
- Double insulated - no earth required.
- IPX4 - Splashproof rated - can safely be installed in Zones I and II.

VERSIONS

EC 2V DT

24 hours running at low speed (selectable between 2 at installation). Speed boosts to maximum via control switch. The maximum speed is provided with a timer (adjustable from 0 to 30 minutes) which activation can be delayed up to 2 minutes to avoid unnecessary night-time operation at the highest speed. (DT option, selectable at installation).

EC 2V HDT

24 hours running at low speed (selectable between 2 at installation). Speed boosts to maximum automatically or manually:

- automatically via humidistat (adjustable from 40 to 90% of R.H). The fan switches back to the low speed when the humidity level goes beneath the pre-selected threshold and once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min).
- manually via control switch (remote or pull cord). The fan switches back to the low speed once concluded the pre-selected overrun via timer (adjustable from 0 to 30 min). The activation of the timer can be delayed up to 2 minutes to avoid unnecessary night-time operation at the highest speed. (DT option, selectable at installation).

All EC models (100 2 speed, 2V DT, 2V HDT) are also available in SELV version, low voltage 12V.

- Centrifugal power
- Ø100 mm with central outlet

Lateral intake on the whole perimeter

Sliding filter

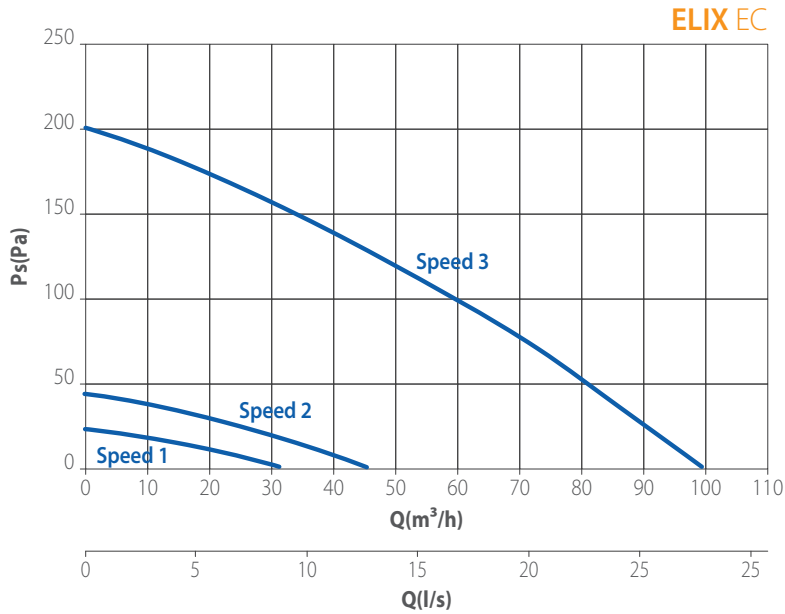

Antivibration gasket

CURVE

AIR CURTAINS

PRINCIPLE

In buildings where the **entrance doors are continuously opened and closed it is useful to block the inflow of undesired outdoor air** during the winter period and to protect indoor spaces from warm air entering during the summer period. In fact, due to the temperature difference that is generated, **there is a progressive loss of power in the temperature control system**, as well as notable humidity imbalances and discomfort for the public, which reduces their time spent in the establishment.

Furthermore, in commercial places with a high customer inflow and rotation, **the presence of traditional entrance doors may constitute a psychological barrier for the customers**, which operators obviously wish to avoid (such as department stores, supermarkets, bars, restaurants, boutiques).

BENEFITS

To obtain a notable energy saving, keeping warm or cool air inside commercial and non-commercial premises, and contribute to making the indoor air healthier by not allowing smog, unpleasant odours, dust, pollen and insects to enter, air curtains come into play.

Air curtains are devices that enable the formation of an invisible vertical wall of air between the indoor area of premises (generally heated or air conditioned) and outdoors, without limiting access by people or vehicles. Depending on the season, the air is mixed in different temperatures and at different supply speeds, in order to reach the optimal conditions for people to pass through.

For this reason they are particularly suited to being used in commercial locations, such as department stores, bars and shops, located either inside or outside of shopping centres, and in places where time that the doors are open is particularly significant for the indoor air conditioning systems (receptions, warehouses, gyms).

The protection offered to the environment enables customers to enter and exit at will, without impeding their path and also maximising visibility of the environment while increasing indoor comfort.

Maico Italia - Elicent® air curtains:

- ✓ ELDOOR TZ - Tangential
- ✓ ELDOOR CF - Centrifugal

are the most innovative and easy to install product on the market to create situations of safe wellbeing and energy saving, drastically reducing energy consumption for heating and cooling, while also protecting the quality of the indoor air.

ELDOOR TZ

Tangential air curtains

FEATURES

- 3 sizes: 90, 120 or 150 cm width
- Air velocity 11 m/s
- Installation height: 2,3÷3 m
- 2 speeds (with LED signal)
- Remote controller included
- Single-phase power supply
- Stainless steel and varnished metal housing
- Airflow orientation through deflectors
- Can be coupled with the door magnetic contact (supplied as accessory) for automatic on/off running
- High efficiency and silent running
- Easy to install thanks to the fixing bracket (included)
- Inlet front side allows an installation close to the ceiling
- Supplied with connexion cable and plug (TYPE L, 3 poles, 10A)

INCLUDED

- 3 sizes: 90, 120 or 150 cm width
- Air velocity 14,5 m/s
- Installation height: 3÷3,5 m
- 2 speeds (with LED signal)
- Remote controller included
- Single-phase power supply
- Stainless steel and varnished metal housing
- Airflow orientation through deflectors
- Can be coupled with the door magnetic contact for automatic on/off running (supplied as accessory)
- High efficiency and silent running
- Easy to install thanks to the fixing bracket (included)
- Inlet front side allows an installation close to the ceiling
- Supplied with connexion cable and plug (TYPE L, 3 poles, 10A)

INCLUDED

HEATING

Complete range of safe and easy to use electric heaters designed to suit any domestic and industrial requirements, as main or subsidiary heating system.

HOW TO DETERMINE THE NECESSARY ELECTRIC POWER NEEDED FOR ROOMS' HEATING (at a temperature of 22°C)

- 1 Find the volume of the room and multiply it by the value reported on the following graph

Example: Room's dimensions 5 x 4 x 3 m = 60 m³
External temperature -5°C
Necessary electric power: 45 w/m³ x 60 m³ = 2.700 W

- 2 The result is indicative as it does not take into consideration the insulation and the position of the room;
- 3 For fan heaters, always choose a model with a superior power
- 4 The final temperature regulation has to be made with the ambient thermostat, supplied with each fan
- 5 In case of discontinuous functioning, prefer the choice of fan assisted heater (TCV).

PRINCIPLE

Temperature is one of the main factors that determine man's wellbeing in confined spaces. However, there are situations in which a permanent heating system is not provided or required, both due to the type and the frequency of use of the room. In these cases, it is essential to guarantee people's thermal comfort with versatile heating systems that can be used in any location and/or at any time, whether residential or industrial.

BENEFITS

Electrical heating meets this requirement and also **has the important advantage of not resulting in gas emissions**, in particular carbon dioxide. It is technically simpler than gas heating and easily lends itself to being **managed automatically and the commissioning costs for electrical heating are considerably lower.**

From the point of view of the urban environment, for safety, versatility and comfort there is nothing better than warming yourself up with electricity: no fumes, no risk of explosions or toxic gases, no maintenance, very quick installation, highly responsive and the possibility to adjust the heating with precision over time and space:

✓ **The industrial convection heaters of the VOLCANO R and PRO Series and residential convection heaters of the CALDO Series from Maico Italia - Elicent® create heat quickly and do not require particular maintenance. They offer ease of transport and can be adjusted/programmed.**

✓ **The infrared lamps of the CALDO Series from Maico Italia - Elicent® transmit heat uniformly into the surrounding environment, keeping the relative humidity constant in all of the environment, thereby promoting thermal wellbeing; all of this in just a few moments, without noise, and obviously with light radiation.** In this way it is possible to obtain more pleasant heating at a relatively low environmental temperature, with energy savings too.

COMMERCIAL / INDUSTRIAL

RESIDENTIAL

CALDO 500

Residential

FEATURES

- Antifreeze heater for wall installation
- Adjustable ambient thermostat
- Double insulation
- Provided with Schuko plug
- Armored resistance

CALDO BAGNO 2000

Residential

FEATURES

- Compact and oscillation heater 24h programmable (with intervals of 30 minutes)
- 4 position switch: Off / cold air / Hot air 1000W / Very hot air 2000W
- Adjustable ambient thermostat
- Body in self-extinguishing plastic material
- Double insulation
- Protection IP21
- Heated area: 20 m²

CALDO LAMP 1500 GOLD

Residential

FEATURES

- Radiant heater for outdoor and indoor installation
- Halogen golden resistance of 1500W
- Body in aluminium
- 0/1 pull cord switch
- Provided with wall fixing kit
- IP55 protection heated area: 15 m²

CALDO LAMP 1500

Residential

FEATURES

- Radiant heater for outdoor and indoor installation
- 3 quartz heaters of 1500W (500+500+500)
- Pull cord selection switch
- Wall fixing bracket offering 4 orientations
- Body in steel sheet, front cover in silver paint
- IP24 protection
- Heated area: 18 m²

CALDO TURBO 2000 TECH

Residential

Remote controller included

FEATURES

- Convector heater using natural convection
- Electronic control and remote controller to manage the stand-by function and the ventilation level (3 settings: Eco 750W / Comfort 1250 W / Rapid 2000W)
- Antifreeze function
- Temperature regulation: 5~37°C
- Programmable timer up to 15 hours
- Turbo function to direct the heat flow towards
- Backlit display in blue which shows the selected functions and the ambient temperature
- Anti-tip switch
- Integrated side handles
- Body in painted steel
- Double insulated
- IP20 protection
- Heated area: 20 m²

CALDO TURBO / CALDO 2000

Residential

CALDO 2000

FEATURES

- Convector heater using natural convection
 - Model CALDO TURBO provided with a frontal grille to direct the heat flow forward
 - Adjustable ambient thermostat
 - Antifreeze function
 - Can be wall-mounted (wall installation kit supplied)
 - Body in painted steel
 - Double insulated
 - IP20 protection
 - Heated area: 20 m²
- Range:**
- CALDO 2000: one model including 3 heating levels: 750 / 1250 / 2000W
 - CALDO Turbo: 3 models with 3 heat setting each:
Caldo Turbo 1000: 350 / 650 / 1000W
Caldo Turbo 1500: 500 / 1000 / 1500W
Caldo Turbo 2000: 750 / 1250 / 2000W

VOLCANO R

Industrial

FEATURES

- Heaters ideally suited for heating small and medium sized industrial premises
- 2 models: 3,3 or 5 kW
- Manufactured in rugged steel cabinet with strong safety insulated handles
- Encapsulated stainless steel heating elements that are extra-insulated from the cabinet
- Provided with safety thermostat which guards against overheating and ensures that fire hazard does not arise
- Provided with room thermostat to maintain the desired temperature
- Selectable heating effect, between 1/2 and 1/1 through the selector switch
- The 5 kW model is provided with a CEE plug of 16A, 5 poles, IP44 while the 3kW model is provided with a Schuko plug of 16A IP44.

Asciugatura di parete in costruzione

Officina

VOLCANO PRO

Industrial

FEATURES

- Heaters ideally suited for heating medium sized industrial premises
- 2 models: 6 or 9 kW
- Very compact and unique dimension for both models
- Housing in steel sheet
- Provided with delay start and delay stop functions, settable on the panel
- Provided with a cooling down post ventilation function (max 10 minutes)
- Provided with a CEE plug of 16A, 5 poles, IP44

VENTILATION

RESIDENTIAL PREMISES

INDUSTRIAL AND SPORTS PREMISES

COMMERCIAL PREMISES

PRINCIPLE

In winter, in heated environments, the less dense hot air tends to accumulate in upper areas due to convection while in summer the gas emissions linked to the large quantities of energy consumed by air conditioning systems require a more attentive and aware attitude towards the environment.

BENEFITS

Ceiling fans are an excellent solution for cooling and heating environments. In winter fans installed on the ceiling are able to destratify the warm air accumulated in the upper areas of the room and to distribute it homogeneously with a consequent energy recovery.

In summer it is not only a reduction in temperature that contributes to cooling but also optimal air circulation: a ceiling fan spinning at low speeds increases the sensation of coolness, makes the air more breathable and reduces the energy costs arising from excessive use of the air conditioning system.

Unlike air conditioners, ceiling ventilation does not alter the temperature and humidity present in the environment and, if used in combination, enables the cooling potential to be fulfilled, allowing the system to be switched on for a less period of time and therefore reducing electricity consumption. It is therefore a simple solution to the energy saving requirement in rooms, industrial or sports environments, and in commercial spaces:

✓ **MP800 destratifiers and POLAR reversible ceiling fans from Maico Italia - Elicent® meet these functionality requirements and are extremely easy to install.**

Ventilation is a simple answer to the need for energy saving.

Simple and convenient
in winter as in summer

Winter

In heated rooms the hot air, which is lighter than the cold one, tends to accumulate in the high areas as a consequence of the convection effect.

The ceiling fans allow to stratify the warm air accumulated in the high areas of the room and to homogeneously distribute it, resulting in an efficient thermal recovery.

Summer

Gas emissions linked to the great amount of energy consumed by air conditioning systems require a more careful and aware attitude towards environment.

It is not only the decrease in temperature that helps to cool the room but also a good air circulation: a ceiling fan that runs at low speed increases the feeling of freshness, makes the air more respirable and reduces energy costs resulting from an excessive use of the air conditioning.

PRINCIPLE

The effectiveness of hand drying is an essential aspect for reducing the transmission of bacteria and other micro-organisms, as it is more likely to occur with wet skin than dry skin; in this respect certain studies have discovered that six times more bacteria grow on the surface of paper towel dispensers than on air-powered devices.

Paper towels are also systematically used in excess with consequent disposal and recycling expenses.

BENEFITS

Electric hand dryers and hair dryers offer the advantage of greater hygiene for the people using them, as direct contact is avoided and is replaced by a jet of hot air that is activated with a button or the photocell, drying the hands or hair while also giving a sensation of softness and cleanliness.

Their operation is ensured 24/7 and paper waste is avoided when using these devices instead.

Rooms in which they are installed are certainly cleaner and tidier, and for high-traffic areas they provide anti-theft and anti-vandalism peace of mind:

✓ In the next generation hand driers of the ECOJET Series from Maico Italia - Elicent® the jet of hot air is replaced with an air blade, which is much more powerful and comes out of several slots, ensuring quick drying in just 8 seconds; although the ECOFLOW Series has a traditional automatic functioning, being equipped with a high speed motor it ensures drying in just 12 seconds. Both series are free from electrical resistance and optimise electricity consumption, and are therefore particularly ecological

✓ The HD and HR Series from Maico Italia - Elicent® guarantee the advantages mentioned above and offer particular cost savings

THE ADVANCED QUALITY

7 Good reasons for choosing hand dryers as opposed to traditional drying systems

- 1 24/7 automatic service.
- 2 No costs of buying, supplying and disposing of paper towels.
- 3 High waste reduction: paper is usually overused, hand dryers are used only for the necessary drying time.
- 4 Restrooms look cleaner and tidier.
- 5 Antivandal models available for high traffic zones.
- 6 Higher hygienic standards, lower bacterial proliferation in the bathroom.
- 7 **Optimized used of energy:** reduced waste and carbon footprint.

THE ADVANCED QUALITY

COVER WITH ANTI-VANDAL LOCK

Steel one-piece vandal-proof cover, extremely robust and impact-resistant. The cover can be locked and removed for cleaning with the special wrench supplied. The special finishing in white epoxy SCRATCH-RESISTANT PAINT is ideal for a long-lasting quality and an efficient cleaning (even from spray paints or marker pens).

UV STABILIZED

Made of UV resistant ABS plastic. Protected with anti-aging and fire-proof paint UL94-V0.

LOW NOISE

The noise levels are among the lowest in this category of high efficiency dryers. The wall fixing plates are provided with an anti-vibration gasket.

QUICK DRY

The high efficiency of all models guarantee a quick dry without energy waste.

AUTOMATIC START-UP

Fitted with an infra-red sensor that starts the product automatically when hand enter the sensor detection field. The sensor is adjustable from 8 to 12 cm through the internal trimmer.

MANUAL START-UP

Pushbutton protected against improper and violent use. Air delivery operates for 35 seconds.

DOUBLE INSTALLATION

Class II products: no earth connection is needed.

QUICK INSTALL

A drilling ruler for a quick installation is supplied in each package. Simplified and secure lock of the cover thanks to the special wrench supplied.

ECO-FRIENDLY

Combines energy efficiency with an optimal drying time.

INSTALLATION FOCUS

Height distance from the floor

Minimum distance for serial mounting

Minimum distance from the wall

TECHNICAL SPECIFICATION

RPM	30.000
Air velocity (Km/h)	410
Air temperature	40°C
Power (W)	420 - 1.100
Consumption (A)	3,2 - 5
Noise level (dBA) at 2 m	65 - 68
Volt	220 - 240
Hz	50 - 60
Insulation	Class I
Estimated drying time	8 - 10 sec.
Weight (Kg)	8,3
Protection	IPX4

FEATURES

- Exclusive design
- ABS cover
- 4 air scatterers
- 2 IR sensors
- Drying time: 8 sec
- Air velocity: 410 km/h at 40°C
- **Energy saving: no heating element**

- Hand dryer of new generation: fast drying, energy efficient, ecologic, hygienic and stylish.
- "Hands in" model. Provided with 2 pairs of IR sensors on both sides of the upper covers for instant hand detection.
- High speed motor. Motor power adjustable. Class F.
- Cover in anti-scratch ABS and aluminium impeller.
- Available in white or satin grey finish.

Eco-friendly and efficient

- Dries hand in 8 to 10 seconds according to the motor speed 8adjustable via an internal trimmer).
- Low energy consumption thanks to the absence of the electric heating element: the efficient drying is given by the velocity and the type of air diffusion and not by the hot temperature as in more conventional driers.
- Lowest noise level in its category.

Hygienic and safe

- The internal surface and the water tank coated with the exclusive Biocote® antimicrobial and antibacterial protection technology based on silver ions. These ions inhibit the reproduction of micro-organisms in the product throughout its lifetime.
- No water dripping onto the floor. Water tank of 0,675 capacity, easily removable for cleaning.
- Provided with an acoustic warning for full tank.
- Easy to maintain: the front casing can be easily removed to access the internal components, quick cleaning of filters, removable water tank, with external valve for easy emptying. All as part of an ergonomic design that facilitates regular cleaning.

Warning lights for a quick diagnosis of the dryer.

4 air diffusion layers for an ultra-fast drying.

Air speed adjusting trimmer.

Water tank easily removable from the external side.

Dry hands in 8 seconds!

TECHNICAL SPECIFICATION

Airflow (m3/h)	187
RPM	19.000 - 30.000
Air velocity (Km/h)	325
Air temperature	40° C
Motor power (W)	420 - 1150
Consumption (A)	3,3 - 4,7
Noise level (dBA)	68-75 dB
Volt	220-240 V
Hz	50-60
Insulation	Class I
Estimated drying time	12 sec
Weight	4,7 Kg
Protection	IP23

- Compact, one-piece steel cover
- Sensor operated for a complete automatic operation
- Drying time: 8-12 sec.
- Air velocity: 325 km/h at 40°C
- **Energy saving: no heating element**

FEATURES

- Energy efficient antivandal hand driers.
- Compact, one-piece steel cover.
- IR sensor operated for a complete automatic operation. Distance detection is adjustable by potentiometer (5-25 cm).
- High-speed adjustable motor, Class F.
- Available in white or steel finish.

Eco-friendly and efficient

- Ultra-fast drying time: 8-12 seconds according to the motor speed (adjustable via internal trimmer).
- Low energy consumption thanks to the absence of the electric heating element: the efficient drying is given by the velocity of the air (325 km/h) and not by its temperature as in more conventional driers.
- Noise registered is at the lowest level among the range of high velocity fans.

Robust and safe

- Antivandal construction in steel with frame in ABS with high mechanical resistance. Provided with silent block to reduce the mechanical vibrations.
- Automatic switch off of the dryer after 60 seconds of continuous use.

Protection	IP23

FEATURES

- Compact, steel one-piece cover white epoxy coated and anti-scratch painted, 1,5 mm thick.
- Cover fixed to the base by means of 2 vandal-proof lock screws and locked with a special wrench supplied.
- Base in aluminium with anti-vibration supports, 3 mm thick, with 4 ø8 mm holes for wall mounting.
- Chrome-plated 360° revolving vandal-resistant nozzle, for hand and face drying.
- Warm airflow (53°C) at high velocity (96 Km/h) for a quick drying.
- Fire-resistant UL94-V0 impeller casing.
- High efficiency centrifugal impeller in aluminium.
- Waved wired NiCr heating element with self-resetable thermal cut-off.
- Universal brush motor, class F, incorporating a safety thermostat and a self-resetable thermal cut-off at 120°C.

SENSORS AND CONTROLLERS

R10 series

SENSORS

R10 TIMER
Remote timer

- **Electronic timer, adjustable from 3 to 25 minutes**
- The fan to which it is connected will overrun after switch-off for the pre-set time.
- Time adjustment via external knob
- ON/OFF light switch
- New design with protection cover
- Suitable for surface and built-in installation
- Ease of connection by means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 HY
Remote Humidity Sensor

- The sensor **automatically** switches ON/OFF the fan according to the detected level of relative humidity, **adjustable from 40 to 90%**.
- The permanent control of the humidity level offers important advantages: maximum comfort for the user and energy saving as the fan is activated only if necessary.
- Suitable for surface and built-in installation
- Ease of connection by the means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 P.I.R
Remote Passive Infrared Sensor

- The fan goes on any time the sensor detects a human presence in the room
- **Provided with integral delay timer adjustable from 3 to 25 minutes**, which keeps the fan running for the pre-set period after the room is vacated
- **Ideal solution for public toilets**
- The green led indicates that the sensor is detecting
- Suitable for surface and built-in installation
- Ease of connection by means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 230V / 50-60 Hz (different voltage upon request)
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 AQS
Remote Air Quality Sensor

- The sensor reacts to tobacco smoke and unpleasant odours
- **It automatically switches the fan ON/OFF according to the detected air quality level, manually adjustable.**
- Suitable for surface and built-in installation
- The permanent control of indoor air quality offers important advantages: maximum comfort for the user and energy saving as the fan is activated only if necessary.
- **Ideal for public premises**
- Ease of connection by the means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

CO₂ Sensor

- The fan automatically starts running when the sensor detects a CO₂ concentration included in a range from 500 to 2000 ppm
- Provided with 5 LED that indicate the level of CO₂ concentration in the air
- Voltage : 14 V - 48 V DC / 16 V - 36 V AC
- Ampere: I_{nom} 0,02 / I_{max} 0,1
- Protection IP20
- Suitable for ambient temperature from 10°C to 40°C
- Dimensions (Lxpxh): 79x30x120 mm
- Weight 0,1 kg

SENSORS AND CONTROLLERS

ELECTRONIC CONTROLLERS

SPEED CONTROLLERS

R10

- Infinitely variable electronic speed controller by potentiometer
- New design with cover
- **Suitable for surface and built-in application**
- Ease of connection by the means of removable terminals
- External trimmer for the adjustment of the fan minimum speed
- Protection fuse
- Preset holes for surface and recessed cable entry
- Single-phase 230V – 50 Hz
- **Max. load 1A**
- Protection IP42
- Weight 0,5 Kg
- Dimensions 110x80x42

R15

- Infinitely variable electronic speed controller by potentiometer
- New design with cover
- ON/OFF light switch
- **Suitable for surface and built-in application**
- Ease of connection by the means of removable terminals
- External trimmer for the adjustment of the fan minimum speed
- Protection fuse
- Preset holes for surface and recessed cable entry
- Single-phase 230V – 50 Hz
- **Max. load 1,5 A**
- Protection IP42
- Weight 0,5 Kg
- Dimensions 138x80x42

RV1

- Electronic speed controller
- Infinitely variable speed control by potentiometer.
- ON/OFF switch
- IP42 protection
- **Max. load: 800 W (4A)**
- **Min. load: 400 W (1A)**
- Supply voltage: 230V-50 / 60 Hz
- Sizes: 110x100x58 mm
- Weight: 0,5 kg

CONTROLLERS WITH TRANSFORMER

SPEED CONTROLLERS

RLS
2 speeds

- **Speed control (Min/Max) and On/Off switch**
- New design with cover
- **Suitable for surface or built-in installation**
- Ease of connection by the means of removable terminals
- Protection IP42
- Weight 0,40 Kg
- Supply voltage 230V – 50/60 Hz
- Dimensions 110 x 80 x 42

RLS 3V
3 speeds

- **Remote 3 speed control (Min/Max) and On/Off switch**
- New design with cover
- **Suitable for surface or built-in installation**
- Ease of connection by the means of removable terminals
- Protection IP42
- Weight 0,40 Kg
- Supply voltage 230V – 50/60 Hz
- Dimensions 110 x 80 x 42

RVS
5 speeds

- **5 steps speed controller (fitted with transformer)**
- ON/OFF switch
- IP42 protection
- **Max. load: 100 W (0,5 A)**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RVS/R
3 speeds

- **Reversible speed controller**
- ON/OFF switch
- IP42 protection
- **Max. load: 0,5A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RVS/R
5 speeds

- **Reversible speed controller**
- ON/OFF switch
- IP42 protection
- **Max. load: 0,5 A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RVS/R PLUS
6 speeds

- **Reversible multi controller**
- Regulation up to 5 pcs of VITRO 9 or 3 pcs of VITRO 12 contemporaneous.
- ON/OFF switch
- IP42 protection
- **Max. load: 1,5 A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 158 x 118 x 76 mm
- Weight: 1,8 kg

RLS 1 WR

- **Remote controller**
- Manual selection of three modality of continuous running:
 - I - Low ventilation modality
 - II - Intermediate ventilation modality
 - III - Intensive ventilation modality
- supply voltage 230V – 50/60 Hz
- Weight 0,50 Kg
- Dimensions 75 x 75 x 30

Supplied with
REC in linea EC 140 - 180 - 220 / REC 320
Accessory for EC versions of Microbox and Multibox.

CP

- **Continuous speed Controller**
- Suitable for Microbox and Multibox Control

TOUCH PANEL
Touch panel controller with coloured screen

The panel allows to manually or automatically manage (through the weekly programming) the following functions:

- The Speed/ventilation level regulation
- The ventilation modality (by-pass function, free-cooling, only extraction, only immission)
- The threshold humidity level over which the unit increases its speed
- The post-ventilation function (Timer function, adjustable from 0 to 30 minutes) to delay the switching of the unit at the minimum speed)
- The Sleep modality that allow to have the unit running silently at low speed during the night
supplied with REC in linea TC, REC 320 TC

REMOTE CONTROLLER
Remote radio controller to manage the following functions

Through the remote radio controller it is possible to manage the following functions:

- On/Off
- The Speed/ventilation level regulation
- The Sleep modality that allow to have the unit running silently at low speed during the night (the boost function is excluded)
- The post-ventilation function (Timer function, adjustable from 0 to 30 minutes) to delay the switching of the unit at the minimum speed
supplied with REC DUO 100 Plus AC

E-VSD

VARIABLE SPEED DRIVE

Controller that continuously adapts the electrical power supplied to the motor in order to regulate the ow rate through the control panel interface **CP-RH** or **CP-AQS**

CHARACTERISTICS

Supply: 220 - 240 Vac ; 50/60Hz.

Maxim un Power: 300 W

W a terproof: IPX4

Main materials: Aluminium cover

Selfestingishing casing (UL - 5VA) for surface mounting installation

CONTROL PANEL

CP-RH

CP-AQS

CHARACTERISTICS

Control panel:

Measures a set of (control) parameters representative of the ventilation demand / quality of the indoor air.

Interface with E-VSD controller.

FUNCTION:	CP-RH	CP-AQS
Temperature control	●	●
Relative humidity detection	●	●
Air quality control		●
Continuous Speed Regulation	●	●
